

WB-Easy

Weighbridge Software Package

BILANCAI

Flexibility and versatility

Cooperativa Bilanciai's WB-Easy weighbridge software is a dedicated, user-friendly Windows based weighing package which opens up new dimensions in the management of weighing data. The system, which is already operational at over 250 sites across Europe, automates weighbridge operations, allowing applications at single and multiple weighbridges to be controlled and data exchanged with higher level ERP systems.

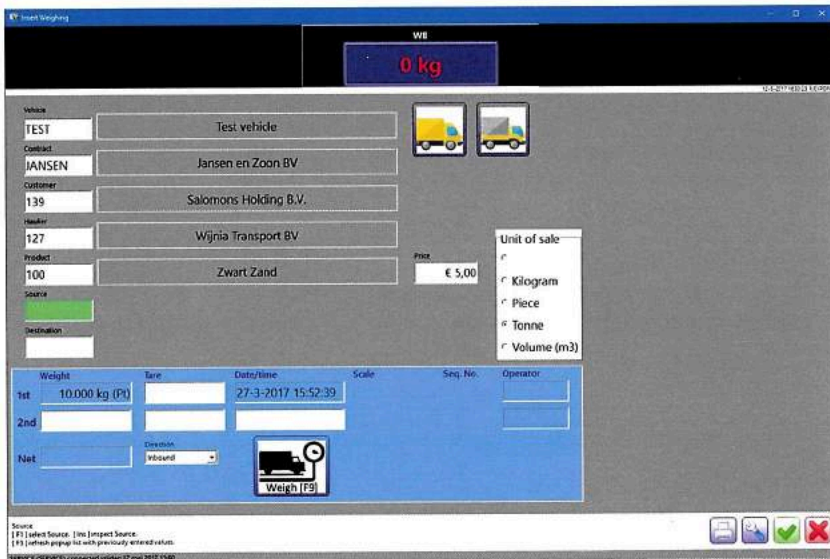

WB-Easy is ideal for use in a wide range of industries including:

- Quarries
- Waste and recycling sites
- Cement plants
- Ports and terminals
- Agricultural & Farming

READY TO PERFORM

Printout and Reports

- Easy to use and Easy to install
- Import/Export data in CSV format
- Day and Period closure
- Backup/Restore database function
- Basic reports
- Definable weighing ticket
- NMI (Weights and Measures) approved with number TC5996

EASY INTEGRATION

WB-Easy can be easily integrated with existing business systems, offering weighing data capture and administration, together with system orientated statistics and reports. At the heart of the application is a powerful database module. Users can create up to four additional tables, modify existing ones, set file variations as well as setting index and sorting codes.

There is a flexible export function for standard file formats and WB-Easy can connect to external databases including SQL, Dbase, Paradox, MExcel and Sybase.

EASY CONTROL

WB-Easy can be used to provide complete vehicle management systems at a plant to help streamline vehicle flow starting with incoming goods through to despatch of finished product.

Full data is stored in the central management system providing full product and vehicle traceability.

Unique address number for clients and haulers.
This will be used as reference code from the weighing screen to this Client or Hauler.

Addresses | Weighing (client) | Weighing (hauler) | Contract (Client) | Tables (Client) | Totals (Hauler) | Vehicle (Hauler)
